TO THE OWNER

Congratulations on your selection of the Heartland AG Systems Tender.

The Heartland AG Systems Tender has been designed to provide years of profitable and dependable service. To assure maximum performance of your Tender it is mandatory that you thoroughly study the operator's manual and follow its recommendations. Proper operation and maintenance are essential for safety and to maximize machine life.

It is the owner, manager, and/or operators' responsibility to:

Operate and maintain this tender in a safe manner and in accordance with all applicable local, state, and federal codes and or laws; and in compliance with labeling instructions by the supplier of the chemicals being used.

Make sure each and every operator has read this manual and thoroughly understands safe and correct operating procedure.

Make sure unauthorized people neither operate the Tender nor are in the vicinity of the Tender while it is in operation.

Make sure the Tender is maintained to preserve and/or improve safety, accuracy, and reliability of the system. Read and follow the maintenance schedule in this manual. Furthermore, as additional technology becomes available, the owner is responsible for improving the safety, accuracy, and reliability of the Tender.

Fulfill all warranty obligations so as not to void the warranties. The warranty information on the following pages outlines the warranty policy of Heartland AG Systems and its suppliers.

Heartland Ag Systems, dba Heartland Agriculture, LLC reserves the right to make product improvements to the equipment at any time. Heartland AG Systems shall not be obligated to make such changes to the machines already in service.

Warranty Policies and Terms

The Heartland Agriculture, LLC warranty is a limited warranty that is provided to the retail purchaser in return for consideration paid as part of the purchase price for a product. The selling dealer must review the warranty coverage with the retail purchaser and obtain a signature on the Operators Manual for warranty verification.

The warranty described here is for Heartland Agriculture, LLC doing business as Heartland AG Systems and its product line Heartland AG Systems Equipment sold and registered in the United States and Canada and normally operated in the United States and Canada.

Warranty Period

The warranty period for all coverage begins at the time that any person, dealer or agent first places the unit into service. At the latest, a unit is placed into service when purchased or delivered to a purchaser.

What's Covered

If a defect in material or workmanship is found in a unit and reported during the Warranty period, Heartland AG Systems will pay parts and labor costs to repair the defects if the services are performed by an authorized Heartland AG Systems dealer. If parts are needed during the repair, Heartland AG Systems will, at its option, use genuine Heartland AG Systems, or remanufactured parts.

Heartland AG Systems provides no warranty, express or implied, for a component or other item that is separately warranted to the purchaser by its manufacturer, such as tires. Check with your local dealer for these details.

Exclusive Remedy

The remedy of repairing a defect in material or workmanship at a Heartland AG Systems dealership under the terms of this warranty is the purchaser's exclusive remedy and is in lieu of any other remedy otherwise available.

No Modification or Extension of Warranty

The Heartland AG Systems Warranty is limited to the written terms in the warranty statement. Heartland AG Systems does not authorize any person, dealer, or agent to change or extend the terms of this warranty in any manner. Any assistance to the purchaser in the repair or operation of any Heartland AG Systems product outside the terms or limitations or exclusions of this warranty will not constitute a waiver of the terms, limitations or exclusions of this warranty, nor will such assistance extend or re-establish the warranty.

The warranty is void if the unit is used in an application for which it is not designed or the unit has been scrapped, salvaged, stolen, junked or totaled.

Limitations and Exclusions

The Heartland AG Systems warranty gives you specific legal rights and you may also have other rights, which vary from state to state. This section contains the entire Heartland AG Systems warranty. Heartland AG Systems makes no other representations or warranties, expressed or implied, and specifically excludes the implied warranties of merchantability and fitness for particular purpose. Heartland AG Systems will not be liable for incidental or consequential damages resulting from a breach of the written warranty or any implied warranty.

 These limitations and exclusions may not be allowed by some states or provinces and shall not apply to the extent such limitations or exclusions are not allowed by applicable state/provincial law.

Owner's Responsibility

The Heartland AG Systems Warranty remains in effect during the warranty period if the owner performs the required maintenance at the recommended intervals outlined in the product's operator's manual and the unit is operated within its rated capacity. Genuine Heartland AG Systems service parts or Heartland AG Systems approved service parts that meet Heartland AG Systems specifications must be used for maintenance and repairs.

What is Not Covered

- Replacement of non-defective wear items expected to be replaced during the warranty period, including, but not limited to: lights, fuses, belts, drive sprockets and chains, hose, soil engaging tools, spray tips, fertilizer deflectors, spinner blades and accessories or items replaced due to customer demand.
- Normal maintenance parts and service, including, but not limited to lubrication, coolants, and filters.
- All travel costs associated with hauling or towing a customer's machine to and from a repair center related to any warranty repair unless specifically covered by a program or policy.
- Repairs arising from any unauthorized modification to the product.
- Repairs arising from service performed by agents not approved by Heartland AG Systems.
- Repairs arising from storage deterioration, failure to maintain the equipment, improper use of the equipment, collision or other accident, vandalism, or other casualty, or operation beyond the rated capacity or specifications.
- Repairs arising from abuse or neglect including, but not limited to operation without adequate lubricants or coolant, over-speeding, contaminated fluids, improper storage, starting, warmup, or shutdown practices.
- Failure of the machine, its implements or attachments caused by improper field application or overloading.
- Premiums charged for over-time labor costs.
- Economic loss, including lost profits, crop loss, equipment rental or other expenses.
- Cost associated with cleaning of machine in preparation for service.
- Loss or damage during shipment.

- Cost of initial setup or installation of any optional equipment or attachments to a unit.
- Items used for repairs include, but are not limited to: solvents, cleaners, anti-seize lubricants, oil-dry, shop towels, shop supplies, special tools, etc.
- Included, but not limited to are checkups, adjustments, and shimming, tune-ups, spread pattern checks, etc.
- Unauthorized modification or field fixes.
- All costs of special tools or shop supplies incurred with repairs.
- Claims for stolen equipment or parts.
- Claims for replacing a complete assembly when the repair is less than the replacement.
- Claims involving the inspection or reconditioning of units.
- Shop comebacks: any duplicate, repeat, or comeback repair resulting from improper diagnosis, testing, or poor service work.
- Cost of removing or installing Non-Heartland AG Systems optional equipment or attachments.

Base Warranty Coverage

 Base Warranty is the factory warranty provided to the customer at no additional cost for a specific period covering the complete machine.

•	Liquid	d Applicators, except tires	1 Year		
•	Spreaders and Tenders, except tires		1 Year		
•	Nh3 Wagons, except tires		1 Year		
•	Bumper Hitches		1 Year		
•	Disc Covers		1 Year		
•	Parts		90 Days		
•	Tande	em Wagons (except tires and main frame)	1 year		
	o	Tandem Wagon main frame	5 Years		
•	Nitror	Nitromaster Toolbars shall carry the following pro-rated warranty:			
	o	Year one, all components except tires	100%		
	o	Year two, center section and wings	80%		
	0	Year three, center section and wings	50%		
	o	Year four, center section and wings	25%		
	0	Year five, center section and wings	10%		

Tires

Tires installed on all Heartland AG Systems Equipment are warranted and serviced by their manufacturer's service outlets. Some manufacturers have separate service outlets for off road agricultural and construction equipment. Service is available by contacting the tire manufacturer's local representative.

Warranty Registration

All machinery items, which are invoiced by Heartland AG Systems on separate receivables, must be registered for warranty. The warranty period for all coverage begins at the time that any person, dealer, or agent first places the unit into service. New machine warranty coverage begins when the machine is registered. Registration is accomplished when a properly completed Warranty Registration is received and processed by Heartland AG Systems.

Operator's Manual/Warranty Receipt Verification

The Heartland AG Systems New Equipment Limited Warranty for Agricultural Equipment statement must be filled out and signed by the customer indicating receipt and an understanding of the operator's manual and the warranty statement,

- The original form must be mailed to the address on the form.
- Make one copy for the Dealer. This copy must be retained by your dealership the same as any other legal document.
- Make a second copy for the customer.

Heartland AG Systems Responsibility

If a defect in material or workmanship is found in a product during its warranty period, Heartland AG Systems will pay parts and labor costs to repair the defect when the service is performed by an authorized Heartland AG Systems dealer or agent. If parts are needed during the repair, Heartland AG Systems will, at its option, use genuine Heartland AG Systems new or remanufactured parts. These responsibilities include, but are not limited to:

- Costs for repairs that are the result of defects in material and workmanship
- Payment to dealers per policy in a timely manner
- Service information to dealers
- Identify product deficiencies and take corrective action by field campaigns
- Make determination of premature wear
- Provide unit that is free of defects in material & workmanship

Dealer Responsibility

Heartland AG Systems dealers are responsible for providing prompt, courteous, and willing service to all Heartland AG Systems equipment owners. These responsibilities include but are not limited to:

- Equipment set-up and pre-delivery
- Sell the right product for the intended application
- Inspect the unit and initiate recovery action on any shipping damage and or shortages
- Instruct customer on proper use, maintenance, and safety features of machine
- Advise and explain warranty coverage to customer
- Diagnose the problem, repair the unit, and submit claims in accordance with the terms and conditions of the warranty claim policies
- Take responsibility for saying "NO" to customers on non-warranty failures
- Apply failure analysis to questionable repairs
- Complete product update campaigns
- Have properly trained technicians and adequate tools for the job
- Retain proper documentation of failure repaired

Owners Responsibility

The Heartland AG Systems warranty remains in effect during the stated warranty period if the owner performs the required maintenance at the recommended times as outlined in the products operator's manual. Genuine Heartland AG Systems or Heartland AG Systems approved service parts must be used for maintenance. Additionally, the owner will pay for all transportation or travel expenses related to any warranty repair.

These responsibilities include, but are not limited to:

- Perform maintenance as indicated in the operator's manual
- Use the unit in the correct application (non-abusive)
- Notify dealer of failures and have the machine available for repair in a timely manner
- Training operators
- Travel cost, towing charges, and service calls
- Normal wear items
- Machine damage (accidental)
- Adjustments for application
- Machine inspection (daily walk-around)

Warranty Eligibility

The dealer is responsible to determine that any Heartland AG Systems equipment is covered by Heartland AG Systems warranty before performing a repair and that the repair is a warrantable failure. Any dealer who is in doubt of the equipment's warranty eligibility may call Heartland AG Systems for verification.

Warranty Repairs Made by the Customer

If a Heartland AG Systems dealer determines that the customer is capable, and the customer requests permission to perform select(warranty)repairs on his product, the Heartland AG Systems dealer is authorized to grant this customer request. The servicing dealer should provide the parts to the customer upon request, and to assure that customer is properly instructed on how to perform the repairs correctly.

The servicing dealer is responsible and accountable for claim accuracy and validity; specifically, in areas such as the parts replaced date, and assurances that the parts are installed as instructed by Heartland AG Systems. The comments section of the claim should clearly state that the customer installed the parts. The claim reimbursement will be for parts and applicable handling only. No labor is allowed! All replacement parts must be held for possible recall.

Parts Shortages on Whole-Goods

Dealers may submit a claim for parts shortages discovered during pre-delivery or during final assembly at the dealer's location. All claims for shortages must be submitted 5 days from the original ship date from the plant and before the warranty start date.

Warranty Reimbursement Policies

Heartland AG Systems provides for warranty reimbursement due to defects in material or workmanship only. Warranty does not include restoring any machine or portion thereof, which has accumulated hours of operation, to factory new condition. This includes customer owned and used equipment.

Except for only a few items not available through Heartland AG Systems, all Heartland AG Systems manufactured equipment warranty repairs must be performed using only Heartland AG Systems genuine new or remanufactured parts and accessories. Installation of non-Heartland AG Systems parts does not qualify for warranty reimbursement and can void the machine's warranty.

Parts

It is fully expected that all claims be filed using part numbers from the applicable Heartland AG Systems equipment parts book whenever such part number exists. Heartland AG Systems shall reimburse the dealer at the dealer net price (cost) in effect on the parts replaced date.

Labor

Heartland AG Systems shall reimburse the dealer at 80% of the dealer's posted retail shop labor rate. The retail shop labor rate shall be subject to verification by Heartland AG Systems from copies of actual dealer invoices to customers.

Outside Charges

Specialized repair such as that done by a machine shop will be accepted as part of a warranty claim at actual cost. Explain the parts used and the service work performed in the description section of the claim and retain a copy of the receipt. Retain a copy of the invoice with the shop work order to support the claim. Outside repairs that exceed the cost of the same repair, if performed by the dealer, will be reimbursed at a lower rate.

Freight

Heartland AG Systems will pay the freight charges when a warranty recalled part is to be returned to Heartland AG Systems.

Travel

Travel will only be reimbursed when authorized by a field campaign.

Repairing or Replacing Parts and Components

When performing a warranty repair, a complete part or component should not be replaced under warranty if the repair can be accomplished at a lower cost. If the total cost of the repair including the cost of parts, labor, and/or outside labor or materials is less than 75% of the cost of the parts, the part must be repaired.

Filters and Lubricants

Replacement of lubricants and filters do not qualify for warranty reimbursement unless damage caused by a defect in material or workmanship results in contamination or sudden loss of fluid. Lack of maintenance, operator misuse, or neglect will not qualify for warranty reimbursement.

Heartland Agriculture, LLC
Claim Form Guidelines

Heartland AG SYSTEMS EQUIPMENT

Claims Must Have

- 1. Product identification number (PIN) or serial number. All characters of the PIN must be used on the warranty claim.
 - Claims for parts warranty must use the word "PARTS" for the PIN. An invoice that shows date of sale or date of installation must be supplied for all parts claims.
- 2. Model Number
- 3. Date of failure Claims must be submitted within 30 days or repair.
- 4. Date of repair
- 5. Warranty start date. Date the unit warranty starts or date the parts were sold for parts warranty.
- Description of the problem. Describe all problems pertinent to the claim.
 Comments should be as precise as possible, attach a separate sheet if necessary, to describe the problem.
- 7. Description of the work performed. List each significant action of the repair.
- 8. Itemize labor. Provide a breakdown of labor for each significant repair action in the "Describe Work Performed" column.
- 9. Shop order numbers. The shop order number field is used for recording your shop work order number that is related to the claim. The shop order number field can also be used to record the parts invoice number when claiming a parts warranty.
- 10. Customer information. Customer information includes the customer name, city, state, county, and postal code. It must match the warranty registration.
- 11. Warranty claim total. The total of all reimbursement costs requested.
- 12. Dealer signature and date. All claims must be signed and dated by the distributor to be validated.

THIS MESSAGE ALERT SYMBOL INDICATES IMPORTANT SAFETY MESSAGES IN THIS MANUAL. WHEN YOU SEE THIS SYMBOL, CAREFULLY READ THE MESSAGE THAT FOLLOWS AND BE ALERT TO THE POSSIBILITY OF PERSONAL INJURY OR DEATH.

Safety Decals on this machine use the words **Danger**, **Warning or Caution**, which are defined as follows:

- DANGER: Indicates an immediate hazardous situation which, if not avoided, will result in death or serious injury. The color associated with Danger is RED.
- **WARNING**: Indicates a potentially hazardous situation which, if not avoided will result in serious injury. The color associated with Warning is ORANGE.
- CAUTION: Indicates a potentially hazardous situation which, if not avoided, may result in minor or moderate injury. It may also be used to alert against unsafe practices. The color associated with Caution is YELLOW.

IMPROPER OPERATION OF THIS MACHINE CAN CAUSE INJURY OR DEATH. BEFORE USING THIS MACHINE, MAKE CERTAIN THAT EVERY OPERATOR:

- Is instructed in safe and proper use of the machine.
- Reads and understands the Manual(s) pertaining to the machine.
- Reads and understands ALL Safety Decals on the machine.
- Clears the area of other persons.
- Learns and practices safe use of machine controls in a safe, clear area before operating this
 machine on a job site.

It is your responsibility to observe pertinent laws and regulations and follow Case Corporation instructions on machine operation and maintenance.

98007AG April, 2002

Safety Instructions

The following chapter covers recommended safety instructions, along with other general recommendations and specific machine safety precautions that should be read thoroughly before operating the machine.

Safety

Read and comply with the operators manual and safety instructions before operating the machine.

Understand that your safety and the safety of other persons is measured by how you service and operate this machine. Know the positions and operation of all controls before you try to operate. Make sure you check all controls in a safe area before starting your work.

Read this manual completely and all other manuals provided with this vehicle, plus make sure you understand the controls. All equipment has a limit. Make sure you understand the speed, brakes, steering, stability, and load characteristics of this machine before you start to operate.

The safety information given in this manual does not re place safety codes, insurance needs, federal, state, and local laws. Make sure your machine has the correct equipment required by local laws and regulations.

Case Corporation is continuing to work for your safety by making tenders with better protection and by giving these rules for safe operation.

WARNING: THIS SAFETY ALERT SYMBOL INDICATES IMPORTANT SAFETY MESSAGES IN THIS MANUAL. WHEN YOU SEE THIS SYMBOL, CAREFULLY READ THE MESSAGE THAT FOLLOWS AND BE ALERT TO THE POSSIBILITY OF PERSONAL INJURY OR DEATH.

⚠ Personal Safety ⚠

Throughout this manual and on the machine's safety decals, you will find precautionary statements: DANGER, WARNING, or CAUTION followed by specific instructions or ISO two panel safety pictorial symbols. These precautions are intended for your personal safety.

Failure to follow the DANGER, WARNING, or CAUTION instructions may result in serious bodily injury or death.

DANGER: Indicates an immediate hazardous situation that, if not avoided, will

SAFETY INSTRUCTIONS FOR OPERATION

1. DO NOT ALLOW ANYONE TO OPERATE YOUR TYLER TENDER UNTIL HE OR SHE HAS READ THIS MANUAL AND IS COMPLETELY FAMILIAR WITH ALL SAFETY AND OPERATION PROCEDURES.

Decal 12429A

WARNING:

Observe the IMPORTANT SAFETY INSTRUCTIONS listed

below at all times.

THE BEST KIND OF SAFETY IS A CAREFUL OPERATOR.

- 2. Do not allow the following people to operate or repair this equipment:
 - Children,
 - Irresponsible persons,
 - People under the influence of alcohol, medications or other drugs that can impair judgment or cause drowsiness,
 - Persons unfamiliar with equipment, or
 - People who are careless, unauthorized or unfamiliar with safe operating procedures.
- 3. Always park unit on flat surface. Shut off engine of vehicle, remove ignition key and set vehicle brakes before making adjustments or repairs to your Tender.
- 4. Watch for overhead electrical wires or other obstructions before operating.

<u>Decal</u> 11495B

- 5. Never allow anyone to ride on the Tender.
- 6. People who are allergic to fertilizer or chemicals must never be allowed in or near the Tender

SAFETY INSTRUCTIONS FOR OPERATION Continued from page

7. Keep all shields in place.

<u>Decal</u> 12181A

8. Make sure everyone is clear of equipment before starting operation.

<u>Decal</u> <u>12182A</u>

- 9. Tenders are designed to be mounted on a chassis for over-the-road transportation of granular fertilizer and chemicals. Comply with all local, state, and federal codes and/or laws; including (but not limited to):
 - Vehicle weight, height restrictions and bumper, brake and lighting requirements.
- 10. If any components of the Tender are not functioning properly, do not use the equipment. Remove it from service until it has been properly repaired by a qualified service technician.
- Do not replace components or parts with other than genuine Factory Service Parts.

 To do so may reduce the effectiveness of safety features or decrease the accuracy of the unit.

WARNING:

Always wear protective clothing, goggles, respirator and gloves when handling herbicides.

DANGER:

Safety instructions furnished by fertilizer manufacturers must be followed exactly to prevent serious harm to individuals and/or the environment.

WARNING:

Observe all Federal and state EPA regulations and all local, state and federal codes and/or laws regarding licensing, handling, storage, transportation, application, and waste disposal of fertilizers or other chemicals used.

CAUTION:

Fertilizer is very corrosive and will oxidize steel over a period of time. This weakens steel parts and can cause possible safety hazards. Periodically check safety shields and structural members for corrosion. Replace or repair anything that could cause a potential safety hazard.

1

The following chapter covers recommended safety instructions, along with other general recommendations and specific machine safety precautions that should be read thoroughly before operating the machine.

Safety

Read and comply with the operators manual and safety instructions before operating the machine.

Understand that your safety and the safety of other persons is measured by how you service and operate this machine. Know the positions and operation of all controls before you try to operate. Make sure you check all controls in a safe area before starting your work.

Read this manual completely and all other manuals provided with this vehicle, plus make sure you understand the controls. All equipment has a limit. Make sure you understand the speed, brakes, steering, stability, and load characteristics of this machine before you start to operate.

The safety information given in this manual does not re place safety codes, insurance needs, federal, state, and local laws. Make sure your machine has the correct equipment required by local laws and regulations.

Case Corporation is continuing to work for your safety by making tenders with better protection and by giving these rules for safe operation.

WARNING: THIS SAFETY ALERT SYMBOL INDICATES IMPORTANT SAFETY MESSAGES IN THIS MANUAL. WHEN YOU SEE THIS SYMBOL, CAREFULLY READ THE MESSAGE THAT FOLLOWS AND BE ALERT TO THE POSSIBILITY OF PERSONAL INJURY OR DEATH.

⚠ Personal Safety ⚠

Throughout this manual and on the machine's safety decals, you will find precautionary statements: **DANGER,W ARNING**, or **CAUTION** followed by specific instructions or ISO two panel safety pictorial symbols. These precautions are intended for your personal safety.

Failure to follow the **DANGER,W ARNING**, or **CAUTION** instructions may result in serious bodily injury or death.

DANGER: Indicates an immediate hazardous situation that, if not avoided, will

- ALWAYS put the controls in neutral, shut the engine off, apply the parking brake, and remove the key BEFORE exiting the tow vehicle.
- Extra weight and bad traction conditions, such as mud or ice, increase your stopping distance. Remember, a loaded machine increases the distance needed to stop.
- DO NOT smoke while servicing the machine.
- DO NOT operate the machine while under the influence of alcohol or drugs.
- Hydraulic oil or diesel fuel are high pressured systems. Make sure all lines and fittings are tight and in good condition. These fluids, escaping under pressure, can have sufficient force to penetrate skin and cause serious injury. Failure can result in serious injury or death.
- Escaping hydraulic fluid under pressure can have sufficient force to penetrate skin, causing serious injury. NEVER check for leaks by using any part of your body to feel for escaping fluid.
- Before servicing the machine, make sure the machine has cooled down. Hydraulic components can get hot enough to cause serious injury.
- After servicing the machine ALWAYS replace guards and shields. NEVER operate your machine with guards and shields removed.
- Be aware of all pinch points on the machine and keep clear.
- Keep bolts tight at all times. Always replace worn or broken parts immediately after they are discovered. Do not use the vehicle if any parts are not functioning properly.
- Do not replace parts with other than genuine factory parts. Doing so could decrease
 the effectiveness of safety features or the accuracy of the machine.
- This machine is designed for the farming industry. Comply with your local and state laws governing weight, lighting, licensing, overhang, bumpers, maximum width, transportation of chemicals, and any other regulations that might apply.

⚠ Safety ⚠

- When disconnecting battery terminals, remove the Negative (-) cable first; then remove the Positive (+). When connecting cables, connect the Positive (+) first, then connect the Negative (-).
- Disconnect the battery (both terminals) before welding on any part of the machine.

Failure to do so may cause damage to sensitive electrical components.

- BATTERY ACID CAUSES SEVERE BURNS. Batteries contain sulfuric acid. Avoid contact with skin, eyes or clothing. Antidote: EXTERNAL flush with water. INTERNAL drink large quantities of water or milk. Follow with milk of magnesia, beaten egg or vegetable oil. Call physician immediately. EYES flush with water for 15 minutes and get prompt medical attention. BATTERIES PRODUCE EXPLOSIVE GASES. Keep sparks, flame and cigarettes away. Ventilate when charging or using in enclosed space. Always shield eyes when working near batteries. KEEP OUT OF REACH OF CHILDREN.
- When working around stage batteries, remember that all of the exposed metal parts are "live". Never lay a metal object across the terminals because a spark, short circuit, explosion or personal injury may result.

⚠ Electrical Line Safety ⚠

- * Know the area before operating the machine. Be aware of power lines, electrical boxes, debris and rocks.
- Watch for adequate overhead clearance when operating the machine.

⚠ Machine Operation and Roll-Over Safety ⚠

- DO NOT ride or allow other persons to ride on the machine. Riders can fall or can cause an accident.
- DO NOT operate the machine while under the influence of alcohol or drugs.
- Be alert and always know the location of all workers in your area. keep all other persons completely away from your machine. Injury or death can result if you do not follow these instructions

⚠ Noise Level Safety ⚠

• Exposure to high noise levels may cause hearing loss. Wearing suitable hearing protective devices protects against loud noise.

⚠ Hazardous Chemicals ⚠

· If you are exposed to or come in contact with hazardous chemicals you can be

- seriously injured. The fluids, lubricants, paints, adhesives, coolants, etc., used with your machine can be hazardous.
- Material Safety Data Sheets (MSDS) provide information about the chemical substances within a product, safe handling procedures, first aid measures and procedures to be taken when the product is accidently spilled or released. MSDS are available from your chemical dealer. It is the operator's responsibility to be familiar with the safe handling of the chemical used.
- Before you service your machine, check the MSDS for each fluid, lubricant, etc., used in this machine. This information indicates what the risks are and how to service the machine safely. Follow this information when servicing the machine.
- Before you service this machine and before you dispose of the old fluids and lubricants, always remember the environment. DO NOT put oil or fluids into the ground or into containers that can leak.
- Check with your local environmental or recycling center or your dealer for correct disposal information.
- Personal Protective Equipment (PPE) is protective gear worn by pesticide handlers as specified in the use directions on a pesticide label.

- Before you service the machine, place a Do Not Operate tag on the machine.
- Always keep safety and informational decals clean and visible. Replace decals that are damaged, lost, painted over or can not be read.
- When assembling, operating or servicing the machine, wear protective clothing and personal safety devices that are necessary for the particular procedure. Some personal safety devices that may be necessary are protective shoes, face and/or eye protection, hard hat, heavy gloves, filter mask and hearing protection.
- DO NOT wear jewelry or loose fitting clothing that may get caught in moving parts.
 Always wear close fitting clothing. Keep hands, feet, clothing and hair away from moving parts.
- Never attempt to clear obstructions or objects from the machine while the engine is running.
- Always stop the engine and remove the key from the key switch when leaving the operators seat or the machine.
- When servicing the machine, always have the machine on a firm level surface.

- seriously injured. The fluids, lubricants, paints, adhesives, coolants, etc., used with your machine can be hazardous.

Operating Instructions

This chapter starts with a pre-operation checklist. Then it explains certain parts of the machine and how they operate. It also presents detailed instructions for first time operators.

Pre-Operation Checklist

Caution: Read the Safety and Operating Instructions section of this manual before operating the MT16 Series Tender.

Inspect unit:

- Be sure all shipping fasteners are removed.
- Check tender thoroughly for screws, bolts, fittings, etc., which may have come loose during shipping.

Transporting

Before transporting the unit, make sure it is secured to the truck bed, trailer, etc. Be sure that the tarp and auger are properly secured in place. Make sure the auger is in the "down" position before transporting.

Operating the Tender

Truck Hydraulic

At engine speed (1750), the hydraulic pump should be running at a minimum of 22 gallons per minute (gpm). Auger speed on the hydraulic unit is approximately 375 revolutions per minute (rpm).

Engine/Hydraulic

Follow the engine manufacturer's recommendations in the maintenance manual. Check to see the engine has proper oil level before starting.

OPERATING AND SERVICE INSTRUCTIONS

UPON RECEIVING YOUR NEW TENDER

When you receive your new TENDER, be sure that all shipping fasteners are removed prior to operation. Check unit for screws, bolts, fittings and set screws that may have come loose during shipment.

TRANSPORTING THE TENDER

Before transporting the unit, check to make sure it is secured to the truck bed, trailer, etc. Be sure that the tarp and auger are properly secured in place.

OPERATING THE TENDER

TRUCK DIRECT PTO

At engine speed (2000 RPM) auger speed is approximately 400 RPM (Refer to #28217 in manual).

See that the cleanout door is shut and properly secured. Always have the auger running before opening the hopper gate. Always shut the gate and empty the auger before shutting the auger off. Make sure the belts and chain are properly tightened on direct drive units.

TRUCK HYDRAULIC

At engine speed (1750 rpm) the hydraulic pump should be putting out 18 - 20 gpm. (Auger speed on hydraulic unit is approximately 375 rpm.)

ENGINE/HYD. OR ENGINE DIRECT DRIVE

Follow the manufacturer's recommendations in the maintenance manual. Check to see the engine has proper oil level before starting.

UNIT

Make sure auger is in the down position before transporting. See that the cleanout door is shut and properly secured before loading. Always have the auger running before opening the hopper gate. Always shut the gate and empty the auger before shutting the auger off.

Maintenance and Servicing

Daily Machine Maintenance

Overnight Storage

Avoid overnight storage of material in machine if at all possible.

Build-up Of Material

Hosing the machine out with water after each day's use will eliminate build-up if this is done before the material has hardened. The auger may be cleaned by unloading dry gravel or similar abrasive materials. Stainless units should be washed regularly, especially 409 stainless because fertilizers containing chlorides will pit and discolor the metal.

Caution: All residue that is washed off the tender must be disposed of in accordance with local, state, and federal EPA regulations.

Tarp

Loosen the tarp or open Flip top (or Roll tarp) so any excess moisture can escape.

Weekly Machine Maintenance

Greasing

Grease all fittings every 75 hours of operation. Use only one (1) pump of a standard grease gun per application. DO NOT USE AN AIR GUN.

Important: Do not over-grease. Over-greasing will break the seals on the bearings and allow fertilizer and dirt into the bearing; thereby, causing bearing failure.

Between Season Maintenance

Hopper Body

Clean all the old fertilizer out of the unit and wash it down thoroughly. Touch up with a rust preventative paint where needed. Clean and lubricate guides for hopper gates.

<u>Auger</u>

Clean auger by running coarse gravel or some other abrasive material through auger until cleaned. Be sure the clean out door is left open.

Caution: All residue that is washed off the tender must be disposed of in accordance with local, state, and federal EPA regulations.

<u>Unit</u>

- Remove the tarp or open and secure Flip top (or Roll tarp) to prevent moisture from being trapped inside the hopper.
- If equipped with engine, remove the battery and store inside.
- If stored outside, cover the engine with a cover or tarp of some kind.

Care Of The Roller Chain

To prevent freezing of the roller chain due to rusting, remove and store submerged in fuel oil between seasons. Do not use regular oil for this purpose.

CARE OF MACHINE

DAILY CARE

OVERNIGHT STORAGE:

Avoid overnight storage of material in machine if at all possible.

BUILD-UP OF MATERIAL:

Hosing the machine out with water after each day's use will eliminate build-up if this is done before the material has hardened. Auger may be cleaned by unloading dry gravel or similar abrasive materials. Stainless units should be washed regularly, especially 409 stainless because fertilizers containing chlorides will pit and discolor the metal.

CAUTION:

All residue washed off the tender must be disposed of in accordance with local, state, and federal EPA regulations.

TARP:

Loosen the tarp or open Fliptop (or Rolltarp) so any excess moisture can escape.

WEEKLY MAINTENANCE

GREASING:

Grease all fittings every 75 hours of operation. Use only one (1) pump of a standard grease gun per application. DO NOT USE AN AIR GUN.

IMPORTANT: Do not over-grease. Over-greasing will break the seals on the bearings and allow fertilizer and dirt into the bearing; thereby, causing bearing failure.

V-BELT: (Engine direct drive units)

Tension on the drive belts (motor to line shaft) should be measured midway between the sheaves. 1/ 16" deflection per inch of span (sheave centers). = 19/64 deflection (new belts) at 7# pull on a scale.

CARE BETWEEN SEASONS

HOPPER BODY:

Clean all the old fertilizer out of the unit and wash down thoroughly. Touch up with a rust preventative paint where needed. Clean and lubricate guides for hopper gates.

AUGER:

Clean auger by running coarse gravel or some other abrasive material through auger until cleaned. Be sure the clean out door is left open.

CAUTION:

All residue washed off the tender must be disposed of in accordance with local, state and federal EPA regulations.

UNIT:

- -Remove the tarp or open and secure Fliptop (or Rolltarp) to prevent moisture from being trapped inside the hopper.
- -If equipped with engine, remove the battery and store inside.
- -If stored outside, cover the engine with a cover or tarp of some kind.

CARE OF THE ROLLER CHAIN:

To prevent freezing of the roller chain due to rusting, remove and store submerged in fuel oil between seasons. Do not use regular oil for this purpose.

LUBRICATION POINTS LISTING

PAGE

Grease fittings on bearing (Ref. No. 8, 10) Lubricate with oil occasionally (Ref. No. 12)

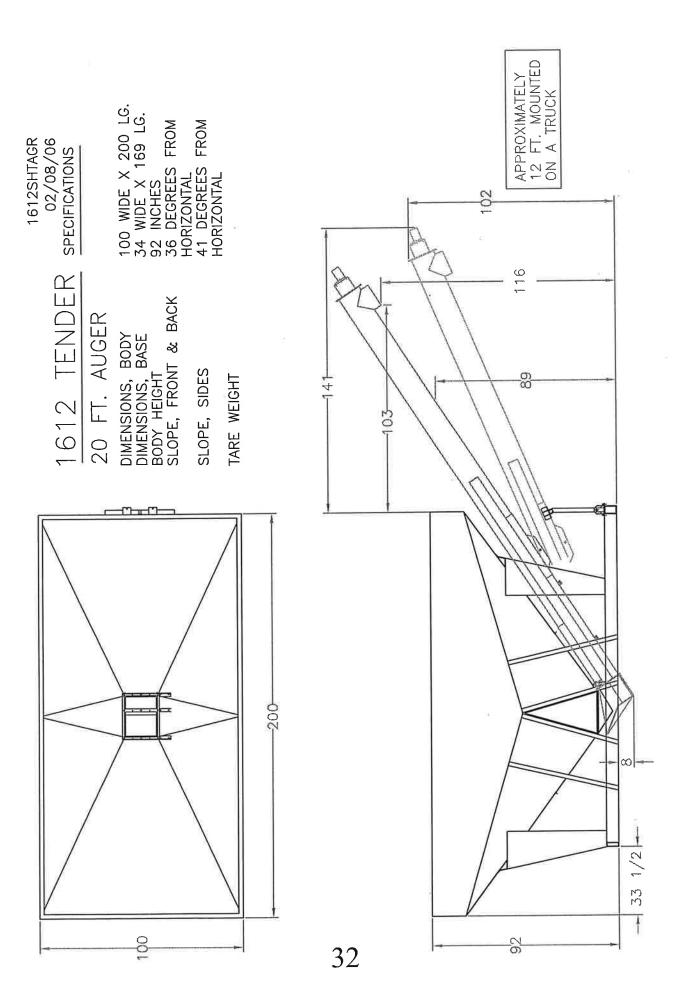

Grease fittings on bearings & "U" Joints (Ref. No. 6, 13, 14)

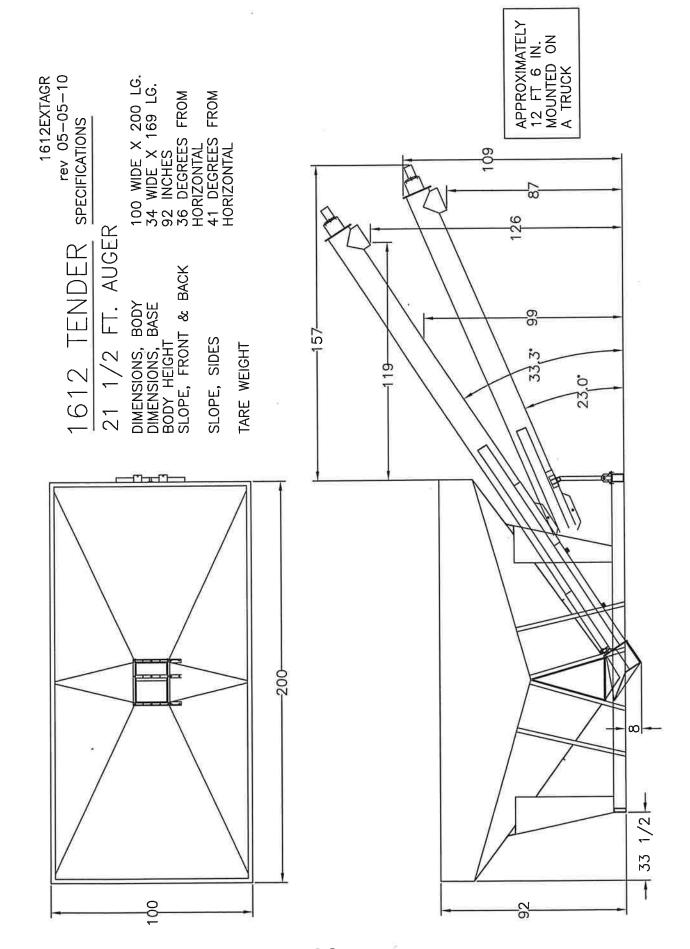

Grease fittings on bearings & "U" Joints (Ref. No. 2, 3, 6)

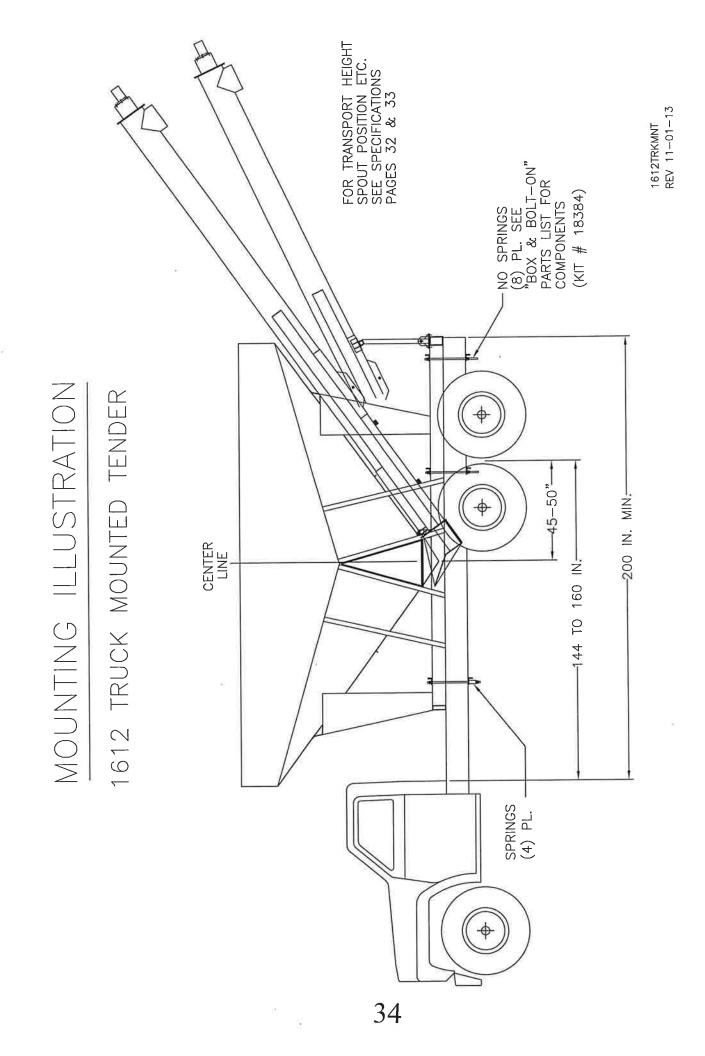

NOTE:

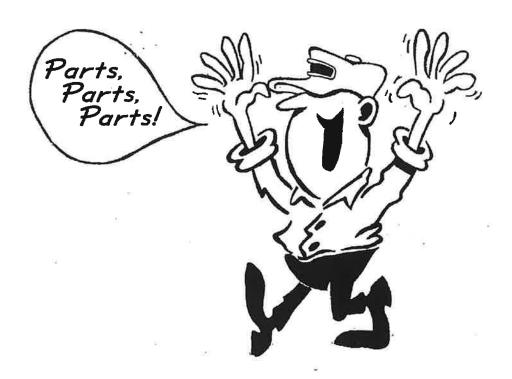

Use Loctite catalog P/N 592-41 pipe sealant with teflon (TCI P/N 54011) on all hydraulic pipe fittings.

1612 CATWALK MOUNTING INSTRUCTIONS

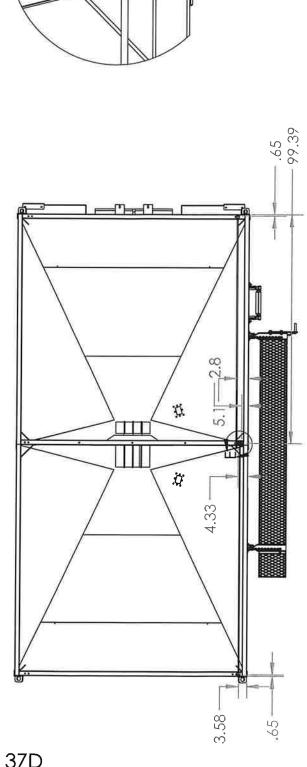

- Mount the catwalk on the left hand (driver side) of the tender box. -. ~:
- Position (1) end mounting bracket (item 4) so that the edge of the bracket is flush with the lower edge of the stiffener bend, and the outside hole is approximately 51.31 from the edge of the tender box. Using the bracket as a template, mark all 4 holes.
 - Slide the bracket to the second position (143.06") as shown on the diagram, and mark the 4 holes. Front and rear brackets must be evel with each other. (see illustration below) 3
 - Drill ϕ 17/32 holes.
 - Mount the end brackets (item 4) with (4) bolts (item 9), (4) backing washers (item 8), and (4) nuts (item 10) (per bracket). Backing washers go on the inside of the box. Install hardware finger tight at this time. 4. 7.
 - Position the catwalk (item 3) to the front and rear bracket, and mount with (2) clevis pins (item 11) and (2) cotter pins (item 12) . ∞
 - securely fasten all brackets at this time.
- lots in the transport lock, and position the hardware so that the head of the bolt (item 13) and the flat washer (item 14) are next to the Assemble a transport lock (item 5) to the outside channel of the catwalk as shown (see Detail B). Position the bushings (item 6) in the ransport lock and the lock washer (item 15), and the nut (item 16) are next to the channel on the catwalk. Securely tighten the
- Assemble the support chains (item 7) to the catwalk and the brackets with the spacers (item 6), bolts (item 13), lock washers (item 15), and nuts (item 16). Test fold and unfold the catwalk to insure proper function. ٥.

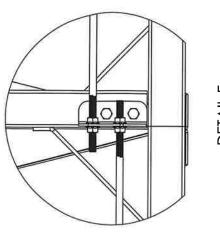

1612 SAFETY BAR MOUNTING INSTRUCTIONS

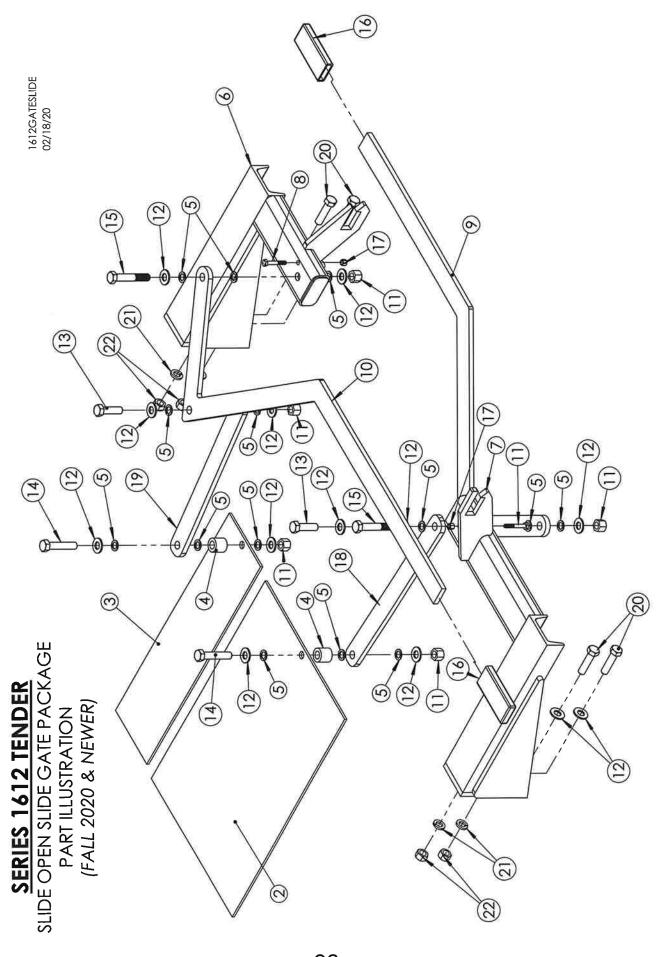

- Position the mounting bracket (item 17) on the center rib as shown, mark the holes, remove the bracket, drill the holes, secure bracket with bolts (item 19) and flange nuts (item20). (Drill bit size 13/32)(If using an Ag Systems Bow Divider the holes exist in the divider but will need to be drilled into the center rib of the tender.)
- Thread one of the supplied flange nuts (item 20) onto mounting bar (item 18) and place it into the mounting bracket ((item 17), (SEE DETAIL E) partially secure with other flange nut (item 20). S
- Mount the end plate of the mounting bar item (18) to the tender using bolt (item 19) and flange nut (item က
- Repeat steps 2-3 for the other side 4.
- Finish by tightening the flange nuts (item 20) securing the mounting bars (item 18) to the mounting bracket (item 17) 5

Also required is a Catwalk Safety Harness kit which includes the lanyard and safety harness. (Heartland Ag Systems P/N:47997965) (included)

SERIES 1612 TENDER 2010 CRANK-OPEN SLIDEGATE PACKAGE RETROFIT INSTALLATION INSTRUCTIONS

1612GATEINSTALL

- STEP 1: UNBOLT THE EXISTING CRANK MOUNT WELDMENT FROM THE FRAME AND REMOVE IT. STEP 2: UNBOLT AND REMOVE THE EXISTING GATE ARMS FROM THE SLIDEGATES.
- STEP 3: PLACE ITEM 8 (CRANK MT) UPSIDE DOWN AS NEEDED TO PROVIDE ACCESS TO NUTS ETC.
 INSTALL ITEM 12 GUIDE BAR USING ITEMS 6 AND 21, BUT DO NOT TIGHTEN AT THIS TIME.
 THREAD NUT ONTO APPROX 1/4" OF BOLT AND LEAVE ALL 4 BOLTS LOOSE.
 IMPORTANT: THESE WILL NEED TO BE TIGHTEND IN STEP 11 OF THE ASSEMBLY PROCESS.
- STEP 4: SLIDE ITEM 16 (FRONT CRANK) INTO THE BUSHING ON ITEM 8 AS SHOWN AND SLIDE ON ITEM 18 INTO THE SLOT AS SHOWN THEN SLIDE ON THE DRIVE SPROCKET INTO THE SLOT AS SHOWN AND BE SURE THE SPROCKET IS FACING THE PROPER DIRECTION PER DIAGRAM BEFORE SECURING IT TO THE SHAFT WITH ITEMS 20 & 21, AND INSTALL ITEM 22 TO HOLD ITEM 18 IN PLACE ON THE SHAFT.
- STEP 5: SLIDE ITEM 15 (SHAFT) INTO THE BUSHING ON ITEM 8 AS SHOWN AND SLIDE ON ITEM 18
 AS SHOWN THEN SLIDE ON 2 DRIVE SPROCKETS IN THE SLOTS POSITIONED FACING AS SHOWN AND
 BE SURE THE SPROCKETS ARE FACING THE PROPER DIRECTION PER DIAGRAM BEFORE SECURING
 THEM TO THE SHAFT WITH ITEMS 20 & 21. THE SHAFT SHOULD SPIN FREELY AND THE DRIVE
 SPROCKETS BE PARTIALLY EXPOSED ABOVE THE SLOTS WHEN PROPERLY INSTALLED.
- STEP 6: SLIDE ITEM 17 (RH CRANK) INTO THE BUSHING ON ITEM 8 AS SHOWN AND SLIDE ON ITEM 18
 AS SHOWN THEN SLIDE ON A DRIVE SPROCKET AS SHOWN AND SECURE WITH ITEMS 20 & 21.
 BE SURE THE SPROCKET IS FACING THE PROPER DIRECTION PER DIAGRAM BEFORE SECURING
 IT TO THE SHAFT WITH ITEMS 20 & 21. THE UPPER AND LOWER SPROCKETS MUST BE IN ALIGNMENT.
- STEP 7: WRAP DRIVE CHAIN (ITEM 19A) AROUND THE 2 DRIVE SPROCKETS AND CONNECT THE CHAIN TOGHETHER USING THE CONNECTING LINK ITEM 19B.

 CRANK ITEM 17 TO SEE THAT THE CHAIN DRIVES THE LOWER SHAFT SMOOTHLY.
- STEP 8: POSTION THE CHAIN GUARD (ITEM 14) OVER THE SPROCKETS AS SHOWN AND BOLT IT TO ITEM 8 AS SHOWN USING ITEMS 13 AND 21.
- STEP 9: THE NEXT STEP WILL TO BOLT THE ENTIRE ASSEMBLY TO THE BASEFRAME MOUNTING PLATES.
 AS SHOWN USING ITEMS 9, 10, 10A, 11. TO FUNCTION PROPERLY THE GATECRANK ASSEMBLY ITEM 8
 MUST BE AS SQUARED AS MUCH AS POSSIBLE TO THE HOPPER SLIDEGATE OPENINGS ON THE BODY.
 SHIM PLATES (ITEM 8A) IF REQUIRED MAY NEED TO BE USED TO SQUARE THE ITEM 8 TO THE BODY.
 VERTICAL ADJUSTMENTS CAN BE MADE USING THE SLOTS IN THE MOUNTING PLATES ON ITEM 8.
- STEP 10: POSITION THE SLIDEGATE BARS (ITEM 4) ONTO THE SPROCKETS AND BOLT THEM TO THE SLIDEGATES AS SHOWN USING ITEMS 5, AND 7, BUT DOUBLE NUT AS SHOWN TO KEEP THE SLIDEGATE BARS SOMEWHAT LOOSE, TO ALLOW SOME SELF—ALIGNMENT MOVEMENT AS THE GATES ARE CRANKED IN AND OUT. DO NOT TIGHTEN THE SLIDEGATE BARS TIGHTLY DOWN TO THE SLIDEGATES, ALLOW GAP AS SHOWN.
- STEP 11: ORIENT THE CRANKS SO THE CRANK HANDLE WILL BE PAST CENTER WHEN CLOSED (10 O'CLOCK POSITION)
 AS SHOWN IN DETAIL A THEN TIGHTEN DOWN THE GUIDE BAR (ITEM 12) TO ITEM 8 TO KEEP THE SPROCKETS
 MAKING GOOD DRIVE CONTACT WITH THE CHAIN ON THE UNDERSIDE OF THE SLIDEGATE BARS.
- STEP 12: RUN THE CRANKS TO FULLY OPEN AND CLOSE THE SLIDEGATES, THEN MAKE ANY MINOR ADJUSTMENTS.
 THE GATE WILL OPERATE PROPERLY IF THE SLIDEGATES RUN CENTERED IN THE GATE TRACK OPENINGS
 AND THE SLIDEGATE BARS (ITEM 4) RUN AS LEVEL AS POSSIBLE DURING OPERATION.
- STEP 13: CHECK TO SEE THAT WHEN THE SLIDEGATES ARE CLOSED THE CRANK HANDLES ARE IN THE 10 O'CLOCK POSITION SO THE GATES DON'T VIBRATE OPEN DURING TRANSPORTATION. LOOSEN ITEM 12 TO MAKE ANY CRANK POSITION ADJUSTMENTS NEEDED, THEN RETIGHTEN.

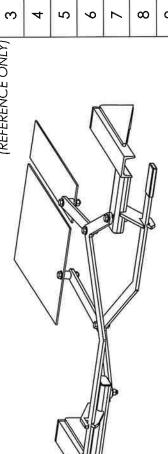

1612 SERIES TENDER SLIDE GATE UPGRADE

DESCRIP SHAFT TUBE TIE ROD BUTT GLAND (CLEVIS REPAIR REPAIR	AUGER LIFT CYL. 3 X 12 47005489 B300120BBAAA07F	010717750A 051514063A 170201162 1415005SF 0815BBGSF 071500244 100000423 470333000 not available
		SHAFT TUBE TIE ROD BUTT GLAND PISTON CLEVIS REPAIR REPAIR

THE ROD DISASSEMBLY-/-ASSEMBLY PROCEDURE.

With the cylinder removed from the machine, cleaned, drained of oil and fully retracted, proceed as follows. DISASSEMBLY

- Secure the cylinder in a vice or other method to prevent rotation. Clean the immediate area so the parts can be laid out.

 Remove the tie rod nuts. Pull the shaft assembly from the cylinder. Remove the tube item (2).

 Loosen the clevis nut and remove the clevis item (7) from the shaft assembly.

 Place the shaft assembly in a vice with brass or copper jaws so as not to damage the shaft.

 Remove all seals from the butt, (item 4) gland assembly, (item 5) and piston (item 6) for replacement. Clean and inspect all parts for damage, (nicks, scratches, cracks etc.). Replace as necessary. If you have any question please contact Prince Engineering (712-277-4061)

REASSEMBLY

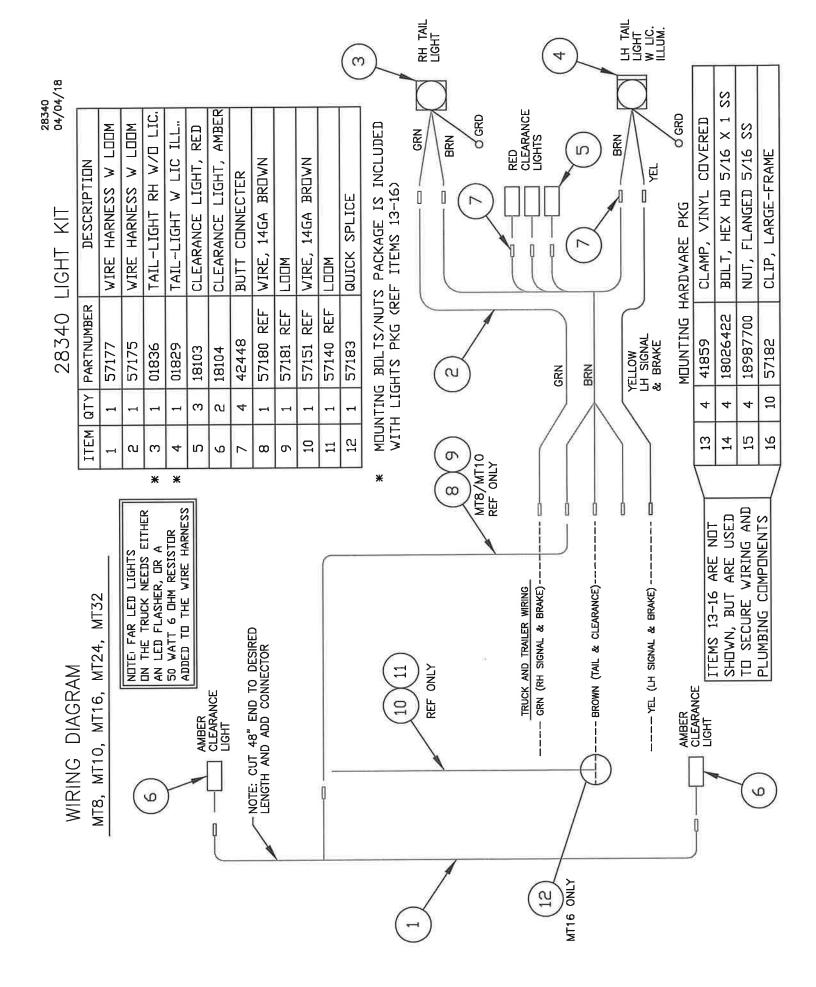

- 1. Replace all the seals on items (4), (5), and (6) except, for non—phasing cylinders do not replace the small o—ring on the ID of the piston item (6) until you are ready to attach the shoft item (1).

 2. For non—phasing cylinders, place the small o—ring seal for the piston over the shaft turndown. Apply a light coat of grease to the seal. Slip the piston item (6) onto the turndown with the o—ring counterbore towards the shaft shoulder. Take care not to pinch the o—ring between the piston and the shoulder. Replace the shaft end nut and secure. 3
- 4. Apply a light coat of grease to the seals on the gland item (5) and slip the gland over the shaft end. Be very careful not to damage the seals. Slip the entire assembly into the lightly oiled tube, item (2) with the piston first making sure the tube slips over the OD seals of the gland.

 5. Take the entire assembly from step 4 and slip the tube over the OD seal on the butt item (4). Align the ports in the butt and the gland and assemble the nuts to the tie rods and torque uniformly.

 6. Torque shaft locknut to 265 +/- 10 ft/lbs.. Torque tie rods to 60 +/- ft/lbs.. Set retract and torque clevis bolt to 28 +/- 2 ft/lbs..

 7. Test the reassembled cylinder for leaks and install in your machine. If you have any problems please contact Prince Engineering (712-277-4061)
